Features

- WV-registered facility specially designed and constructed by SECUR for the management of gas and oilfield materials
- Perma-Fix Environmental Services provides on-site certified analytical laboratory as well as access and coordination of services for their clients in the natural gas and oil industry
- Dedicated, enclosed buildings for the management of solids, sludges and liquids for separation, solidification and repackaging for transport to offsite disposal facilities
- All processing and storage areas have secondary containment to safeguard the environment
- Workforce, which includes certified radiological professionals, is highly skilled and experienced in safe material handling practices
- Easy truck access from WV State Route 2 into the 10-acre facility
- Onsite CSX rail service allows materials to be shipped by rail rather than over the road to long-distance disposal facilities

Oilfield Liquids Processing

- 10,000-barrel storage and processing capacity for liquids separation and proper offsite disposal of residues
- Tanker truck offloading system designed to move trucks quickly offsite

Solids & Sludge Processing

- Large daily receipt capacity enables quick truck offloading and departure
- Materials received are dewatered, solidified and repackaged for transport to offsite disposal facilities

Other Services

- Transportation Logistics—Trucks and Railcars
 - Truck transport by roll-off, dump, tank truck, vacuum truck, flatbed, intermodal chassis and other specialty equipment
 - Rail transport using privately owned railcars for bulk or containerized shipments
- Containers and Packaging
 - Vacuum containers, roll-off containers and intermodal containers for truck and rail shipment of bulk solid and liquid materials
 - DOT-certified intermodal containers for Class 7 Radioactive Waste shipments
 - Flexible packages specifically designed and engineered for the material types

The Ben's Run Materials Management Facility is the first of its kind in West Virginia to accept and process TENORM-containing liquids, sludges and solids.
